Office Action Summary

Application No.

10/693,981

Applicant(s)

TAMURA, MASASHIGE

Examiner

Ryan Gleitz

Art Unit

2852

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 July 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 July 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Notani et al. (JP 2000066500).

Notani et al. disclose an image forming apparatus in figure 27 including: a developing device (Dm) containing developer including toner and carrier, the developing device (Dm) having a first chamber (62) for developing an electrostatic image formed on an image bearing member (16), and a second chamber (64) constituting a developer circulating route between the second chamber and the first chamber, as shown by figure 7.

A carrying member (R2) is rotatably provided in the second chamber (64) for carrying the developer, and a rotary member (H) holds the developing device (Dm) and is rotatable in a route including a developing position. Supplying means (R1) is for supplying the developer to the developing device, which is in the developing position.

Shutter (71) is a valve mechanism for opening and closing the opening (67a) by operation of gravity of the valve mechanism with the rotation of the rotary member.

Art Unit: 2852

Developer exhaust port (67a), or alternatively end connection (74), is an opening provided in the second chamber (64) for outwardly discharging therethrough any excess developer resulting from the supply of the develop.

Upper wall (W2) is a wall portion provided in the second chamber on a side on which the opening and closing member (71) is opened. A portion of developing device (Dm) from figure 27 is shown below, which shows that wall portion (W2) has a protruding portion protruding toward an inside of the second chamber (64).

Regarding claim 2, the wall portion (W2) is provided between the opening (74) and the carrying member (R2) so as to narrow a developer containing space in the second chamber (64).

Regarding claim 3, the opening (67a) is located above the wall portion (W2) when the excess developer can be discharged through the opening, for example in the case of Dm in figure 27.

Regarding claim 4, the second chamber (64) has a substantially U-shaped cross section, and the wall portion is provided so as to protrude from a straight portion of the U-shape toward the carrying member side.

Art Unit: 2852

Regarding claim 5, a plurality of developing devices is also shown in figure 27, wherein the rotary member locates any one of the plurality of developing devices held by the rotary member in the developing position.

Response to Arguments

Applicant's arguments filed 1 July 2005 have been fully considered but they are not persuasive.

Applicant submits that Notani et al. do not teach a protruding portion of a wall portion that protrudes toward an inside of the second chamber. However, as indicated in the figure above the wall portion (W2) of Notani et al. is clearly sectioned, having one portion protruding toward an inside of the second chamber.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
